Why TIS-Web®?

TIS-Web® (Tachograph Information System) enhances your offering with certified tachograph information from tachograph master makers.

TIS-Web® provides greater security and reliability as well as legally compliant saving and archiving of vehicle and driver data, based on tachograph information.

This intelligent fleet management software supports your organization by managing driving and rest periods as well as remaining driving time safely and efficiently.

TIS-Web® is a cloud service (SaaS), which is easily accessible from any device, everywhere in the world.

Thanks to its level of customization and its modular design, TIS-Web® is suitable for fleets of all sizes and performance ranges.

TIS-Web® allows fleet manager to meet their legal storage and archiving obligations when using the tachograph. The completely new user interface and responsive design provide a better fleet overview and are compatible with the intelligent tachograph DTCO® 4.0.

Completely new user interface and user experience

- Responsive design for any device
- Available throughout Europe in 28 languages
- Compliant with country-specific working time directives
- Infringement calculations
- Also serves as evaluation software for authorities
- Freely configurable rules and privileges
- Remote download capable to manage your fleet remotely

TIS-Web® intelligent

Innovative and efficient

TIS-Web® Partner Benefits

We recognize there is no one-size-fits-all partnership. Choose a level that best suits your organization's business model and service/solution offering. Your success is our success!

We are already integrated with:

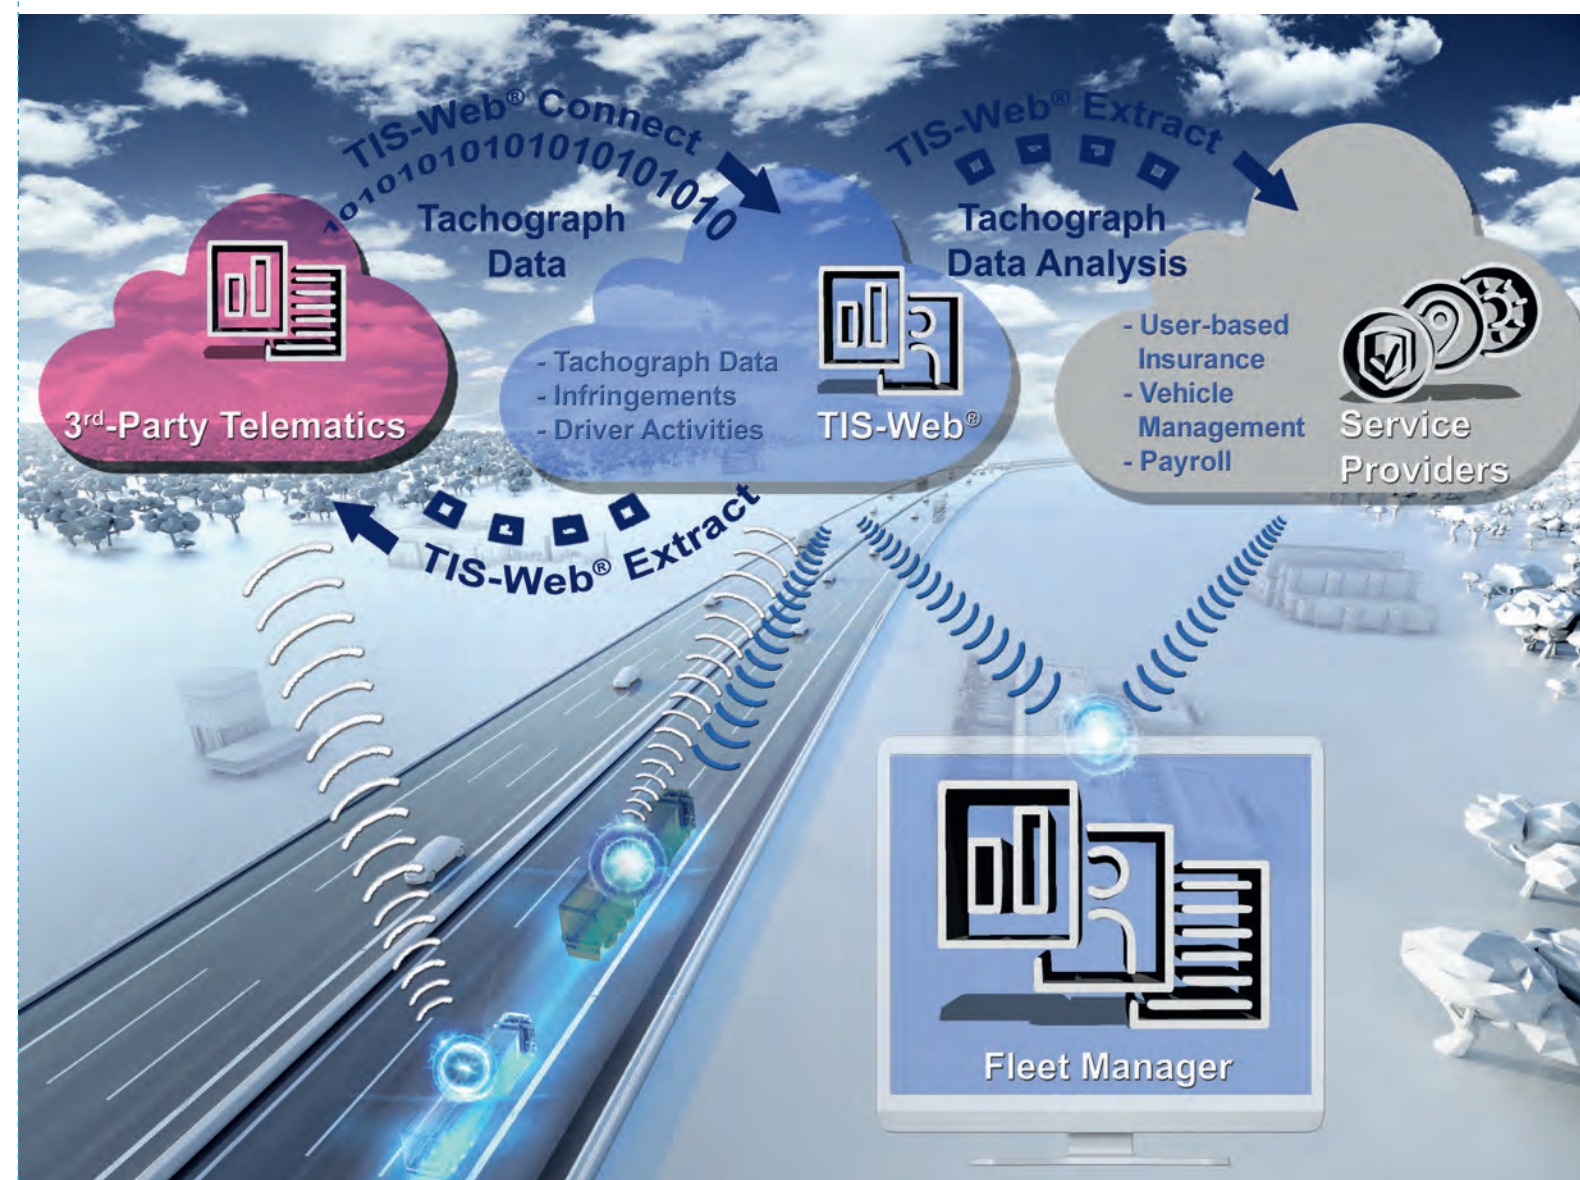

TIS-Web® is open!

Thanks to the VDO Tachograph Information System, developers and integrators make the most of the potential that comes from data.

Synchronize information, integrate and analyze data. Increase your service offerings by partnering with us. TIS-Web® delivers data for vertical service integration.

Use the power of TIS-Web® (REST or SOAP API) to create more value for your customers.

Tailor-made Solutions

TIS-Web® Connect

The TIS-Web® Connect interface enables you to transfer data, such as digital tachograph data, easily and securely from your server or cloud to TIS-Web®. There, your customers can use all the archiving and evaluation functions offered by TIS-Web®. TIS-Web® Connect is available as a REST- and SOAP-based programming interface. Benefit from VDO's experience in the field of digital tachograph data to enlarge your service offerings towards your customers. We are happy to adapt to the individual requirements of our partners.

TIS-Web® Extract

With TIS-Web® Extract, we offer software companies the opportunity to integrate specific data sets from the TIS-Web® cloud into their own software solutions. Enrich your telematics offerings through additional tachograph-related reports or use data for payroll accounting, vehicle management and much more. For the innovative telematics services of tomorrow.

TIS-Web® Index

TIS-Web® Index bundles the advantages of comprehensive analysis of driver and vehicle data. Through individual weighing of data records, it is able to create comparative values for various business fields. Insurance companies can use it to compile more accurate risk analyses to offer cheaper policies, for example.
